

How do you know you need to talk to someone?

If you recognise any of these signs in yourself or others, take the first step and **share your thoughts and feelings** with someone you trust like a family member or friend. Sharing your thoughts and feelings can make you feel so much better.

Frustration

Changes in sleeping patterns

Overwhelmed by problems

Emotional

Substance use and abuse

Difficulty making decisions

Hard to concentrate

Problems with aggression

Changes in eating

Withdraw from others

As well as **talking** to someone there are other things you can do to **keep yourself mentally healthy**. Why not...

- ✓ Get regular exercise
- ✓ Listen to music
- ✓ Read a book
- ✓ Get a good night's sleep
- ✓ Chill out
- ✓ Join a club
- ✓ Spend time with friends
- ✓ Eat healthily
- ✓ Do something you're good at
- ✓ Set goals to achieve
- ✓ Balance work time, rest time and play time

If you have got **things on your mind** and you **don't feel comfortable talking** to someone who is close to you, there are other people who want to help you.

PROMOTING **positive** mental health

through working with young people

salus

Promoting Positive Mental Health

how is your mental health?

We all know the importance of being physically healthy by exercising, eating well, sleeping well etc. but what about our **mental health** - what do you do to look after your mental health?

Your mental health is to do with your thoughts, feelings and beliefs and has an impact on every aspect of our lives.

what is good mental health?

Good mental health means **feeling positive about yourself**, being able to cope with life and the challenges it brings, and being able to form and keep relationships.

express our feelings

make good decisions

feel in control

feel like we belong

feel positive

enjoy our friendships

When we look after our physical health and our mental health we can feel good about ourselves and the world around us. We can:

bullying
body image
school peer pressure
your sexual identity
future growing up
family/relationships
bereavement

Think of your own life...

what affects your mental health?

Your mental health matters

In life it's normal to have **ups and downs**, but if the downs start to take over it is a sign that we need to take some action.

Feeling worried about your mental health is nothing to be afraid or embarrassed about. If you feel worried or the pressure is getting too much, don't bottle it up and suffer in silence - seek support, ask for help.
